

***2007 IOTA SIGMA PI
GLADYS ANDERSON EMERSON SCHOLARSHIP***

Stephanie Hemmingson, Kenyon College

Stephanie Hemmingson is a Chemistry and Physics double major who shows enthusiasm and dedication to science. Her research involves an extremely unpleasant smelling compound that requires rigorous techniques; she is so diligent that she never needs to worry about social stigma associated with sloppy technique. She is also a terrific TA for introductory physics. Outside of science, she finds to time to be the star pitcher of the college softball team. Stephanie has the intensity and tenacity to succeed at each task she chooses.
